

Psst, your window is open.

Meet Strips.

SMARTHOME SOLUTIONS BY SENSATIVE

You won't believe what you're not seeing.

Strips by Sensative is a revolutionary magnetic sensor designed to monitor and protect windows, doors and other valuables. It's so thin that in most cases, it can be mounted invisibly to the end-user. With an adhesive strip it's as easy to mount as a sticker and the custom designed battery will last up to ten years. With Z-Wave® technology, Strips fits in effortlessly with existing Z-Wave® smarthome systems. Configuring Strips, you can allow it to notify you when something is left open, when something is opened or moved when you're not home and even be set when you're home sleeping.

- ✓ Ultra-thin - Less than 3mm
- ✓ Two-way Z-Wave® communication
- ✓ Magnet sensor
- ✓ Temperature sensor
- ✓ Vibration sensor: Optional feature only found on Strips-vibe
- ✓ Built-in battery
- ✓ Adhesive backing

BENEFITS

- Can notify you when you've left a window or door open
- Can alert you when something unexpected happens whether you're home or not
- Ultra-thin design allows Strips to be mounted "invisibly" between most doors/windows and their frames
- Simple to mount with the included adhesive backing
- Easy to connect to any Z-Wave® gateway
- Up to 10 year battery life means no more changing batteries
- Mercury free battery, better for the environment
- Protects the perimeter of your home even when you're asleep
- Strips' built in temperature sensor can help you take control of your energy costs
- Strips-Vibe is able to detect if the sensor is tampered with or even when a glass window breaks
- Strips-Vibe can also be used as a stand alone to detect if an object it's mounted on is moved.
